EXPERIENCE THE INNOVATION

Ino'Holds is a **new innovative climbing holds** brand.

Explore your senses

AlpX, textured skins

With Ino'Holds, we are reinventing the climbing take known until now. Between finely drawn lines and curious textures, our climbing takes advocate a return to the senses. **Reconnect with your emotions and explore unknown sensations through unique climbing experiences.**

Reinvent matter

GreenMix, the innovative and ecological material

To reinvent matter is to question it. To question its technical characteristics, its ecological impact, its sensory qualities. With GreenMix, we create a more sustainable, responsible and environmentally friendly material.

Manufacture climbing

A French brand and ethics

Ino'Holds offers innovative products. French know-how is given pride of place for these ethical and aesthetic achievements. **Responsible climbing is always possible.**

EXPERIENCE THE INNOVATION

GREENMIX : A NEW HEMP FIBER MATERIAL

“ Made from recycled or biosourced materials, recycled PET plastic bottles that are reused in GreenMix ”

“ France is the main hemp producer in the world; it is obvious for us to work with this material ”

1.

Innovative Material

GreenMix is an innovative blend. Between polyurethane resin and polyester resin, GreenMix is a **hybrid material** with surprising properties. **A French innovation** that offers a new way of making climbing.

2.

Technical Material

GreenMix is a technical subject. It retains the positive properties of polyester resin such as: **the durability of the exemplary grain, strong UV resistance, reasonable cost**. The disadvantages are avoided: the natural material makes our mixture of **a good lightness, a robust resistance** and **a better resistance to shocks**.

3.

Ecological Material

GreenMix is a recycled, fortified and durable material. **Our innovative use of hemp fibre** adds lightness and robustness to this hybrid material. Thanks to **recycled PET** and **bio-sourced materials**, the share of non-recyclable materials in our mix is significantly reduced. **1 recycled plastic bottle for 1 liter of GreenMix made !** All raw materials come from French production, which promotes the country's economic development while promoting ecology.

COLOURS

AlpX is a technique for designing and producing **a new skin** for climbing holds that offers unique performance, comfort and aesthetic qualities. Textures are fully customizable to provide the desired climbing experience for pros, beginners and kids.

Exceptional longevity due to low surface wear and high resistance to pore magnesia powder clogging makes the holds more environmentally friendly and economical.

This technology is the next step in the evolution of the hitherto artisanal world of climbing holds at no extra cost, bringing new fields of exploration to climbers.

FIXATION
INSERT + WOOD SCREWS

In bouldering, a fall to the ground with a bad landing is **the 3rd cause of injury**. It causes damage (sprains and dislocations) especially to the joints: ankles, knees and wrists. Promoting down climbing allows everyone to climb more safely. **Down climbing avoids successive falls** which produce shock waves absorbed by the lower back.

Meticulously designed, Jugs Down XL offers **optimal grip** to climbers. The down climbing is **safe and comfortable**. The cylindrical shape of the grip provides a hook that maximizes friction forces for calm down climbing !

Suitable for slabs with their slight prominence, it can also be used on slopes. A large space at the back of the grip does not limit the stop of the fingers when gripping it. It **provides ideal grip** when the grip is located downstream of the downspout or on an inclined wall. Jugs Down XL is wide enough **to easily bring/change hands**. Without protrusion thanks to its **flared shape**, we avoid shocks to the head, elbow and knee during an ascent.
